

The complete seed. Not safe to lose, not safe to keep.

Wallet / label:

Created on:

Passphrase set? Kept where:

This sheet alone opens the wallet. Treat it like the funds themselves.

Once every share is written down and verified, destroying this sheet removes the single point of failure.

Words of your seed 12 words, in this order, splits into 20-word shares

BIP-39

4.

10.

5.

11.

6.

12.

Check address (first receiving address of the wallet):

Write it down before splitting. It is the only way to tell a correct recovery from a plausible one.

About this sheet

What this is

the BIP-39 mnemonic itself, not a share. It belongs in a wallet.

Passphrase

if one is set, it is deliberately NOT on this sheet. Note only where it lives.

After splitting

verify every share, restore once as a test, then destroy this sheet or store it as securely as all the shares put together.
